

Jean Noel, MD

- My name is Dr Jean Noel. I am an obstetrician and gynecologist practicing at Carney Hospital since September 2009. I received my medical school education in Haiti. After completing my residency in obstetrics and gynecology at a leading Boston teaching hospital, I chose to remain in the Boston area.
- I chose to practice at Carney because of their excellent medical staff, their deep devotion to serve the community and their compassion for delivering healthcare to the underserved. Bringing my obstetrical practice to the Dorchester area provides medical care to women who want to receive care closer to home.
- I am very proud to say that Caritas Christi Physician Network and Carney Hospital have collaborated to improve health services for women. In the last year, they have opened a new Women's Health Center. The Center provides pre-natal services, full gynecological services and newly added urogynecology service.
- The Carney Hospital staff is committed to continue to meet the needs of the community. We have made many positive gains in recent years in the quality and types of services we offer. We look forward to the transition to Cerberus as a way to provide continued strength to Carney Hospital to deliver excellent community services.

Thank you
